ASHE संस्कृती

**Signal Isolating Repeater
Model # TX-234**

New Arrivals

TX-234

The new ASHE TX-234, which is a prominent model in the series of Signal Conditioners, Isolators, Transducers, Transmitters and Multipliers from Ashe Controls, has been recently upgraded in design and dimensions. This revision has been done on the initiative and effort of Mr. Ajay Khandagale of the Production team.

The new version is very compact and light-weight, as it uses SMPS power supply design thereby greatly reducing the weight and bulkiness of the earlier design. This will eliminate transit damage failures owing to the heavy Transformer in the earlier model. Further it has been designed using the standard TX series PCBs which will help in expediting deliveries of this product. The instrument accepts all standard industrial process input signals and provides four isolated analog outputs. The instruments operate on universal AC power supply and are offered in compact industrial grade enclosures in DIN Rail / Wall-mounting execution.

Ashe Controls is proud to acknowledge this initiative from Mr. Khandagale which has brought about a significant improvement in the product.

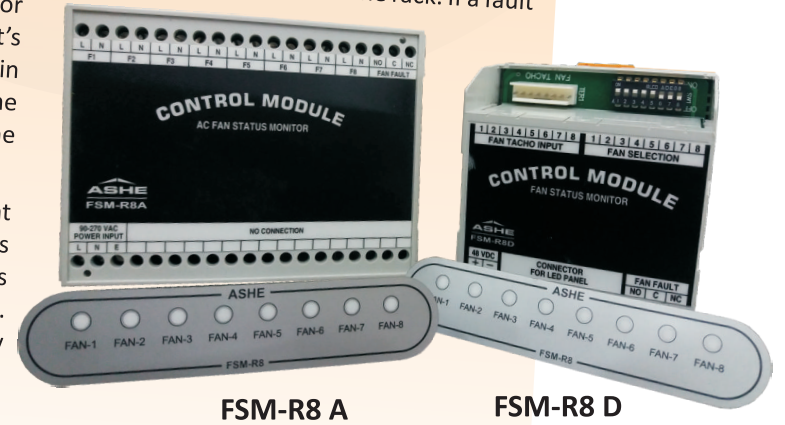

Fan Status Monitor Model # FSM R8A & R8D

The Fan Status Monitor and Indicator is an instrument used to sense the functional status of all the Fans mounted within the Rack. The Rack can have up to eight DC exhaust Fans mounted on the rear or upper section of the panel.

The instrument comprises of two sub-units : an LED Strip Display and a Control Module. The Control Module is a microcontroller based electronic device which monitors the movement of the Fans in the rack. If a fault is detected in any of the Fans owing to blocked-rotor condition or fan failure, a Relay will change-over and it's potential-free contacts can be wired individually, or in tandem with the contacts of all the Racks within the control room to provide a Hooter, which will caution the operator that one of the Fans within the Rack is faulty.

The LED Strip will have eight bi-polar LEDs on the front panel which will indicate the live status of the Fans mounted within the Rack. If the fan is running normally, it's LED will indicate Green colour on the front panel LED strip. Similarly, any fault in the fan causing a rotor block will show the corresponding LED to be Red in colour.

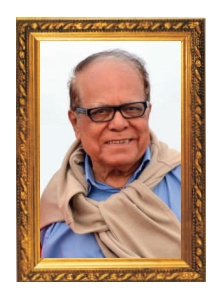

The instrument can monitor up to eight Fans. However, it can also be configured for a smaller number of Fans (less than eight) by a simple configuration. The Control Module operates on 48 VDC power supply and provides the power to the LED Strip on the front panel.

Bhagyawan Gaikwad in a bubbly mood

Friends Forever
When I am sad,
or just having a bad day,
You're always there.
Doesn't matter what mood I'm in,
You're always there.
Thank you very much,
I really appreciate it.
I love the friendship we share.
The sound of your soothing voice
when we talk fills my heart with joy
and happiness.
Through thick and thin we will stand
together
You're always there.
We will always be friends forever and
ever.
I will always be there for you
And
You will always there for me.
Thanks for your lovely friendship.

The Way of Life
Gladness after Sorrow..
Sunshine after Rain..
Harvest after Seedtime..
Comfort after Pain
Blossoms after Pruning..
Victory after Strife..
As the way of Nature..
So the way of Life.

कणा
'ओजसवत का नर गता?' पम्पकाव आता कोणी, कपडे होते कर्दमलेते, केसांदरी पाणी.
आणमर मला अंतर झळा बोळवा सती पाहू, 'मंगमाई पाहणी आजी, गेठी धरण्यात जाहू'.
माहेरसापिंगीमासखी वार गितीत बावळी, जोकळ्या हाती जाईल कणी, बावळी मात्र बावळी.
फिट खचली, चूड विझली, होते नक्की वेजे, असम्य न्याय पापकावरी वाणी बोलू देजे.
विशाकडे हात जाताने हात झल उडवा मीसे नकोत सर', जसा एकडेमगा बाटळा.
कारमागणीला घेऊन गेमे सर आता कवठो आहे पडवी फिट बांधतो आहे, विखळलाय काढतो आहे, जोडवा पडला नंगार तरी जोडला बांधी कणा पाठीवरती हात ठेऊन, तुम्ही फक्त लढ रणणा !

नजर रखो अपने विचार पर,
क्योंकी वे 'शब्द' बनते हैं।
नजर रखो अपने शब्द पर,
क्योंकी वे 'काय' बनते हैं।
नजर रखो अपने 'काय' पर,
क्योंकी वे 'स्वभाव' बनते हैं।
नजर रखो अपने 'स्वभाव' पर,
क्योंकी वे 'चरित्र' बनते हैं।
नजर रखो अपने 'चरित्र' पर,
क्योंकी वे 'जीवन' बनते हैं।
